

Established Solar Photovoltaic Company Seeks Solar PV Installers

Living Solar, based in Durango, Colorado, is seeking full time solar installers with either recent field experience in the installation of photovoltaic systems, or a strong interest in learning the business. Responsibilities include installation of solar photovoltaic systems in the field, assuring the highest standards of mechanical and electrical workmanship, attention to safety, and on-time completion of projects. The ideal candidate will have experience in some or all of the following areas:

- field installation of photovoltaic systems
- demonstrated teamwork skills, including the ability to help promote a positive team environment through collaborative decision making
- general construction knowledge and ability to interpret basic electrical and structural plans and field layouts
- comfortably able to lift 75lbs, climb ladders, work with tools, and work on roof tops in varying temperatures
- some understanding of solar PV installation and design, or a compelling interest in developing a solar PV expertise may be suitable
- strong communication and interpersonal skills

Responsibilities will include roof attachment of PV panels, racking and module assembly, combiner box installation, homerun wiring, conduit and wiring runs, inverter installation, grid inter-tie, and voltage testing. Must be willing to learn and stay abreast of developments in the industry that are germane to maintaining the highest of standards in electrical and mechanical design and workmanship.

This is a full time position to start in March of 2013. The position is weather dependent December through February of each year, and is based out of our Durango office with a salary of \$12 - \$18/hr (DOE and aptitude). To apply, please e-mail cover letter and resume to jeff@livingsolar.net by February 22.

About Living Solar
