

Established Solar Photovoltaic Company Seeks a Colorado Licensed Master Electrician

Living Solar, based in Durango, Colorado, is seeking a full time Master Electrician with either recent field experience in the installation of photovoltaic systems, or a strong interest in learning the business. Main responsibilities will be the supervision of PV installation crews in the field, assuring the highest standards of mechanical and electrical workmanship and customer satisfaction. The ideal candidate will have experience in the following areas:

- field installation of photovoltaic systems
- knowledge of generally accepted “best practices” in the PV business
- intimate knowledge of the current edition of the NEC code
- in-the-field crew supervision
- ability to complete projects on time and within budget
- superior record keeping skills
- exceptional communication skills, both in-house and with customers

We are looking for a licensed Colorado Master Electrician that will primarily work in the field on job sites, and be responsible for daily hands-on management of the installation phase of our solar photovoltaic projects. Recent experience in the industry as an integrator is most valuable. Alternatively, someone with a compelling interest in developing a solar PV expertise may be suitable. The position will be responsible for supervising one or more crews at any given time. Must be able to coordinate crews and sub-contractors with a high level of efficiency. Must be comfortable dealing directly with customers regarding their concerns, and recognize the importance of meeting or exceeding contractual obligations. Must be willing to keep abreast of developments in the industry that are germane to maintaining the highest of standards in electrical and mechanical design and workmanship.

This is a full time position, based out of our Durango office. March 15, 2012 start date and profit sharing/ownership stake negotiable. To apply, please e-mail resume, cover letter, and salary history to jeff@livingsolar.net.
